

It's Time for a Food Revolution!

Together we create the solution

A Food Crisis is Looming

Record rainfall in Britain has meant that some 71% of our fields are now too wet for farmers to plant their crops, threatening to bring us the first year without a harvest since the Second World War.

Adding to the problems, farmers are being offered large payoffs to stop farming and turn their land over to solar and wind farms.

What is the Solution?

As supermarket shelves empty and prices increase, we now have a responsibility to ourselves and each other to **Take Back Our Power**.

The People's Food and Farming Alliance is working with farmers, small growers and people like yourself with a garden, balcony or land to repurpose to fill the food gaps.

To find out how you can get involved in the **More Farmers, More Food** campaign and learn how you can better grow your own, visit the PFFA website: <https://the-pffa.org> #MoreFarmersMoreFood
